

METAL SAFETY SPRAY SHIELDS

for FLANGES & VALVES

PREVENT HAZARDOUS LEAKS AND SPRAYS

STYLE I

- New, simple and effective, *patented* design.
- Lockable, adjustable, quick latch fastener.
- No tools required, installs in seconds.
- Allows for complete visibility of bolt ends and nuts.
- No sharp edges.
- Minimal space requirements.
- Stainless steel netting absorbs and dissipates pressurized sprays by distributing it around the flange circumference.
- Locking feature allows integration for lockout/tagout procedures and recordkeeping.
- Optional safety pin available.
- Constructed of 316 stainless steel.
- Available for all size and ratings of flanges, including square and oval shaped flanges.
- Available in widths of 2" and 2 3/4".
- Maximum operating temperature of 2000°F/1093°C.
- Suitable for hazardous processes of high temperatures, high pressures, steam, chemicals, and flammables for fire prevention.

STYLE II

- Recognized, well-known industry design.
- Overlapping, slotted side edges prevent lateral sprays.
- Spacer rods ensure pressure reduction & fluid distribution through flow space.
- Fabricated of 24 gauge, 316 stainless steel.
- Hose clamp style fastener assures securing.
- Maximum operating temperature of 2000°F/1093°C.
- Recommended for high temperatures, high pressures, steam, chemicals, and flammables for fire prevention.

DRAKE SPECIALTIES

METAL VALVE SPRAY SHIELDS

- Style II 's wider design & overlapping edges are suitable for valves, fittings, and custom fit applications.
- Two hose clamps per Shield ensure complete securing.
- Style II Valve Shields available for:

“Style II” Bonnet Shield

- Ball Valves
- Butterfly valves
- Plug Valves
- Check Valves
- Gate Valve Bonnets
- Globe Valve Bonnets

“Style II” 316SS Valve Shield

“Style II” with optional drain nipple

Style II Options

- Optional anti-spray screen liner reduces splashing.
- Optional gasket liners.
- Optional drain nipple benefits:
 - Drain port for visual inspection.
 - Vent port for complete air circulation.
 - Connection point for spill recovery and secondary containment related purposes.

NON-METAL SAFETY SPRAY SHIELDS

- PTFE Flange & Valve Shields - 4 material styles.
- Poly Flange & Valve Shields - 5 material styles.
- Expansion Joint Shields
- Pipe & Hose Shields
- Marine Roll Shields
- Custom Shields

Other Quality Products:

- Flange Isolation Gasket Kits
- Flange Band Protectors
- Nut & Bolt Protectors
- Solas Anti-Spray Tape
- Insulation Blankets
- Centralizers

Certifications:

- ISO 9001:2015
- ABS(American Burea of Shipping)
