## PIPE END COVERS

- Designed to pull over and cap the open ends of pipe vent outlets.
- Provides protection for safety relief valves and rupture discs, critical to plant and pipeline safety.
- Keeps out debris and foreign material such as rainwater, snow, dirt, sand, birds, animals, and insects, to ensure proper operation and extend service life.
- Made from durable fabrics resistant to chemicals, UV, and weather.
- PVC fabrics available in 4 colors: safety yellow, safety orange, red, and grey; maximum temperature of 170°F/76°C.
- PTFE coated fiberglass fabric is natural brown colored; maximum temperature of 500°F/260°C.
- Contains draw cord for securing, and grommet for attaching retrieval rope.
- Requires 5-10 psi of internal air to blow cover off.
- Available for 45° angled and 90° straight cut pipe ends.
- Available for all standard and custom size pipe diameters.
- Ask about our Pipe Night Caps; similar design for overnight closing of pipelines.
